

1. 4th Energy Conversion and Economics Annual Forum, ECE Forum 2024

Accession number: 20251918369017

Source title: IET Conference Proceedings

Abbreviated source title: IET. Conf. Proc.

Volume: 2024

Part number: 1 of 1

Issue: 33

Issue title: 4th Energy Conversion and Economics Annual Forum, ECE Forum 2024

Issue date: 2024

Publication year: 2024

Language: English

E-ISSN: 27324494

ISBN-13: 9781837242627

Document type: Conference proceeding (CP)

Conference name: 4th Energy Conversion and Economics Annual Forum, ECE Forum 2024

Conference date: December 14, 2024 - December 15, 2024

Conference location: Beijing, China

Conference code: 208444

Publisher: Institution of Engineering and Technology

Abstract: The proceedings contain 253 papers. The topics discussed include: current differential protection method for unipolar ground fault of DC distribution network based on current variation characteristics; economic optimization of design scheme of large-scale offshore wind farm's collector system; capacity value assessment of energy storage for load supplying considering system demand and capacity credit; short-term wind power forecasting model based on a two-stage method; impacts of decarbonization policies on electricity cost of different load types: a case study of Shandong; coordinated operation of active distribution network considering demand response; and the formation and development of Australia's electricity financial market and implications for China's electricity market development.
